

PRANAV MUKESH KUMAR MISTRY

B.Tech. - Computer Science & Engineering

Ph: +91-9825590839

Email: pranav.m.mistry@nuv.ac.in

Vadodara, Gujarat, India - 390016

LinkedIn: <https://www.linkedin.com/in/pranav-m-mistry/>

CAREER OBJECTIVE

Motivated and enthusiastic B.Tech Computer Science and Engineering student with a strong interest in Software Engineering, Full-Stack Web Development, Artificial Intelligence, and Machine Learning. Skilled in Java, Python, SQL, JavaScript, HTML, CSS, React.js, Flask, Database Management Systems, and modern software development practices. Through academic and practical projects, I have gained hands-on experience in web application development, machine learning, API integration, database design, and intelligent software solutions. I am eager to apply my technical knowledge, problem-solving skills, and continuous learning mindset in a dynamic organization where I can contribute to innovative projects, grow professionally, and create impactful technology-driven solutions while delivering value to the organization.

KEY EXPERTISE

OpenCV React.js Machine Learning Web Development Mobile Application Development Artificial Intelligence
Computer Vision Git Software Development Python Problem Solving SQL

EDUCATION

Navrachana University B.Tech. - Computer Science & Engineering CGPA: 8.08 / 10	2023 - 2027
Baroda High School, Vadodara 12 th GSEB Percentage: 61.69 / 100	2023
Ambe & Jay Ambe Vidyalaya, Vadodara 10 th GSEB Percentage: 76.16 / 100	2021

PROJECTS

Hostel-Management-Swing-StayFlow_HUB

Mentor: Dr. Avani Vasant & Mr. Vivek | Team Size: 4

Key Skills: Java JDBC Swing NetBeans HTML CSS XAMPP MySQL

Project Link: https://github.com/Pranav-Mistry/Hostel-Management-Swing-StayFlow_HUB

Developed a Hostel Management System using Java, JDBC, and MySQL to automate hostel administration and student management processes. The application features separate Student and Admin modules, enabling students to access hostel information, room details, roommate records, and payment status, while allowing administrators to manage room allocations, occupancy records, hostel charges, and regulations. Contributed to database design, JDBC integration, user interface development, and application testing, ensuring efficient, accurate, and reliable hostel operations.

NASDAQ AI Stock Prediction System

Mentor: Dr. Jaideepsinh Raulji, Dr. Yogesh R. Chaudhari | Team Size: 4

Key Skills:

Python Machine Learning Random Forest Apache Spark Hadoop MongoDB Streamlit Big Data Analytics
Deep Learning

Project Link: <https://github.com/Asmetha0205/NASDAQ-AI-Stock-Prediction-System>

Developed an AI-powered Stock Market Prediction System for NASDAQ-listed companies using Machine Learning and Big Data technologies. The system analyzes historical stock data, market trends, and technical indicators to forecast potential stock price movements. Contributed to data preprocessing, feature engineering, model development, and performance evaluation, enabling data-driven insights for market analysis and investment decision-making.

AI-Based-Realtime-Pothole-Detection-System

Mentor: Prof. Ashish Jani | Team Size: 1

Key Skills:

OpenCV Machine Learning Computer Vision Flask Ngrok Tunneling Deep Learning Artificial Intelligence
PDF Automation

Project Link: <https://github.com/Pranav-Mistry/AI-Based-Realtime-Pothole-Detection-System>

RoadGuard AI is a full-stack, real-time Artificial Intelligence system designed to automate road damage identification and reporting. The system uses a trained YOLOv8 deep learning model to detect road potholes in real-time. Once a pothole is detected by a field surveyor's mobile camera, the application captures the hardware GPS coordinates, maps the location on an interactive GIS map, and automatically generates an official municipal PDF complaint report containing the location metadata and annotated proof-of-damage images.

GlobeTalk

Mentor: Dr. Megha Joshi | Team Size: 3

Key Skills: Android Studio Java Firebase Rest API Mobile Application Development

Developed a real-time multilingual communication application using Android Studio, inspired by modern messaging platforms. The application supports user authentication, instant messaging, chat management, and real-time message delivery. Integrated a Translation REST API to enable automatic language translation, allowing users to communicate in their preferred languages while recipients receive both the original and translated messages. Contributed to application design, API integration, user interface development, and testing, enhancing accessibility and seamless cross-language communication.

AI-Powered Study Planner & Exam Preparation System

Mentor: Mr. Chirag Darji | Team Size: 4

Key Skills: React Native Flask Python Firebase Firestore Rest API AI Integration Machine Learning

Project Link: <https://github.com/Asmetha0205/ai-assignment-tracker>

Developed an AI-powered Study Planner and Exam Preparation System designed to help students organize their learning and prepare effectively for examinations. The platform generates personalized study plans based on syllabus requirements, available study time, and learning objectives. Implemented features such as AI-driven note summarization, question answering, flashcard generation, syllabus analysis, and progress tracking to enhance learning efficiency. Contributed to system design, AI integration, and feature development, creating an intelligent and user-centric educational solution.

Feastique – Online Food Ordering Platform

Mentor: Mr. Dhaval Mehta | Team Size: 5

Key Skills: React.js Node.js Javascript MongoDB

Developed Feastique, a full-stack online food ordering platform designed to provide a seamless and user-friendly food ordering experience. The application enables users to browse restaurants, explore menus, manage carts, place orders, and securely access personalized accounts through user authentication. Implemented features including restaurant and menu management, order processing, responsive design, and intuitive navigation. Contributed to both frontend and backend development, creating a scalable and efficient platform that enhances user engagement and simplifies online food ordering.

FitnessFreakGym

Mentor: Prof. Ankita Dave | Team Size: 1

Key Skills:

PHP MySQL Razorpay API Javascript Responsive Web Design HTML5 Database Design Bootstrap 4 jQuery

Project Link: <https://github.com/Pranav-Mistry/fitnessfreakgym>

Developed a secure, responsive, web-based Gym Management Portal that automates member registration, authentication, and subscription plan purchases. The system integrates the Razorpay API to allow users to purchase monthly, yearly, or premium memberships through real-time online transactions. Built using PHP, MySQL, JavaScript, and Bootstrap 4, the application features secure user authentication protected against SQL Injection and XSS using prepared database statements. The checkout process utilizes jQuery AJAX for real-time payment validation and automated database logging to deliver a mobile-friendly user experience. Ongoing roadmap enhancements are focused on designing an admin analytics dashboard, establishing a relational membership-tracking database for automated subscription expiry calculations, and implementing dashboard alerts for upcoming plan renewals.

ASSESSMENTS / CERTIFICATIONS

Data Engineering Course

Provider: AWS

Key Skills: Big Data Analytics Apache Spark MongoDB Hadoop

Completed a Data Engineering course covering ETL processes, data pipelines, data warehousing, and big data technologies. Gained practical knowledge of data collection, transformation, storage, and analysis, along with concepts such as data modeling, database management, distributed computing, and data integration. Developed an understanding of building scalable and efficient data-driven solutions using modern data engineering practices.

Machine Learning Course

Provider: AWS

Key Skills: Machine Learning

Completed a Machine Learning course covering supervised and unsupervised learning, data preprocessing, feature engineering, model training, and model evaluation. Gained hands-on experience with machine learning algorithms including Linear Regression, Decision

Trees, Random Forest, and Clustering techniques. Developed practical skills in building predictive models, analyzing data, and applying machine learning concepts to solve real-world problems using Python and industry-standard libraries.

Machine Learning

Provider: GDSC

Key Skills: Machine Learning

Completed the "Google Demystifying Machine Learning: A Workshop for Beginners" conducted by Google Developer Student Clubs (GDSC), Navrachana University. Gained foundational knowledge of Machine Learning concepts, including data preprocessing, supervised and unsupervised learning, model training, and AI applications. Developed an understanding of machine learning workflows, algorithms, and data-driven problem-solving techniques, strengthening my interest in Artificial Intelligence and Data Science.

SEMINARS / TRAININGS / WORKSHOPS

GDSC Machine Learning Institute Name: Navrachana University

Key Skills: Machine Learning

Successfully completed the "Google Demystifying Machine Learning: A Workshop for Beginners" organized by Google Developer Student Clubs (GDSC), Navrachana University. The workshop provided an introduction to core Machine Learning concepts, including data preprocessing, supervised and unsupervised learning, model training, and AI applications. Gained foundational knowledge of machine learning workflows, algorithms, and problem-solving approaches used in intelligent systems, further strengthening my interest in Artificial Intelligence and Data Science.

PERSONAL DETAILS

Gender: Male	Date of Birth: 02 Oct, 2005
Marital Status: Single	Known Languages: English,Hindi & Gujarati
Current Address: 18,Ashirwad Nagar,Gujarat Housing Board,Opp. Bapu ni Dargah,Refinery Road,Gorwa,Vadodara., Vadodara, Gujarat, India - 390016	Phone Numbers: +91-9825590839, +91-9825040839
Emails: pranav.m.mistry@nuv.ac.in , pranavmistry2005@gmail.com
